

Appendix m.

Support signatures from
Carmen families
(South and Southeast)
and from people
attended south campuses
open houses in
Support of a new
Carmen south side
middle school.

Carmen

High School of
Science Technology

SOUTHEAST CAMPUS

"Graduating all students as critical thinkers and self-directed learners prepared for success in college, meaningful careers, community involvement, and family life."

"I am interested in having Carmen Schools of Science and Technology open a middle school on the south side of Milwaukee. If Carmen opens a middle school, I would be interesting in having my child(ren) attend so they could enter one of Carmen's two south side high schools."

Sample Teacher Work Week Schedules

Appendix N

Middle School Priorities

The Middle School schedule provides a bridge between the elementary experience outside of Carmen and the Carmen High School of Science and Technology experience. We believe in the following foundational priorities:

- Supporting our scholars daily with Advisory in order to lay the foundations for developing character and the growth mindset and to build relationships that establish the kind of school community Carmen envisions.
- Scaffolding and supporting independence to build scholars who are High School Ready
- Engaging in longer blocks (70 min.) of all four core courses to allow for the multiple kinds of instructional strategies and small group instruction that best engages learners
- Extending deliberate practice of literacy and math skills through personalized learning blocks
- Differentiating opportunities for choice through Choose Your Path and after school activities
- Celebrating growth through multiple touch-points (e.g., advisory, Friday a.m. meeting, and Friday afternoon Zest Fest)

English and Math teachers teach three blocks a day every day whereas science and social studies teachers rotate content area blocks with differentiated learning blocks to support literacy and math skills development through a combination of small group learning and personalized learning using computer-based enrichment tools such as Achieve 3000 and ALEKS.

2:30-2:45 (15)	Dismissal Duty
2:45-4:30 (105)	Professional Development

Middle School Assessment Plan

Appendix O

Assessment Plan and Annual Goals

State- and MPS-Mandated Tests:

STAR. Students in grades 6-8 will take the STAR assessment required of all MPS students in the same windows of time and will be expected to meet or exceed the expected achievement gap closure rates of MPS students as per the standard MPS charter contract.

Wisconsin Forward Exam. Carmen middle school students will take the Wisconsin Forward exam and be expected to meet or exceed the scores of MPS students for ELA and math and any other subjects measured by this or any other required state exams as per the standard MPS charter contract.

Local Measures:

NWEA MAP. Because students are likely to enter Carmen's middle school grades several years below grade level in reading and math, it is helpful to have another nationally-normed tool like the NWEA MAP to predict growth in the middle school grades. The NWEA MAP test, like the STAR exam already required by MPS, can be used to measure student growth from Fall to Spring and to compare students' annual growth and overall achievement to that of students nationally. Individual year-end growth targets are set by NWEA based on individual student performance. *The MAP test will only be given to students in grades 6 and 7 and in both Fall and Spring.*

Annual growth goals for this "local measure" are:

- 1) 60% of middle school students (grades 6 and 7 combined) or more meet their annual growth goals from Fall to Spring in reading
- 2) 60% of middle school students (grades 6 and 7 combined) or more meet their annual growth goals from Fall to Spring in math
- 3) Middle school students (grades 6 and 7 combined) have an average percent of projected growth of 120% or more in reading
- 4) Middle school students (grades 6 and 7 combined) have an average percent of projected growth of 120% or more in math

Pre-ACT. Every 8th grade student will take the Pre-ACT exam in the Fall and Spring as a "local measure." Academic growth of students in 8th grade will be measured by the pre-ACT and not the NWEA MAP, as the pre-ACT is a better measure of high school readiness since it can be compared to scores of Carmen freshmen.

Annual growth goals for this "local measure" are:

- 1) The average Fall to Spring growth on the pre-ACT in math for 8th grade students will be one point or more (i.e., the equivalent of one or more years)
- 2) The average Fall to Spring growth on the pre-ACT in English for 8th grade students will be one point or more (i.e., the equivalent of one or more years)
- 3) The average Fall to Spring growth on the pre-ACT in reading for 8th grade students will be one point or more (i.e., the equivalent of one or more years)
- 4) The average Fall to Spring growth on the pre-ACT in science for 8th grade students will be one point or more (i.e., the equivalent of one or more years)
