Dear MPS Families,

We hope your school year is off to a great start. We want to share some information with you regarding water testing in our schools.

This summer, we began a districtwide effort to conduct precautionary testing of drinking water in our schools. Our decision to test water was prompted by concerns about the quality of drinking water in several communities across the country.

We had hoped to finalize this effort during the summer. However it has taken more time than anticipated and will continue for the next few weeks. In some instances, there may be a temporary interruption of service as we update some fixtures. This will not interfere with normal school activities. We ask for your cooperation and patience as we work towards the completion of this project.

Information regarding the results of the water testing will be shared with school families as soon as they become available.

If you have any questions, please contact your principal.

Thank you,

Keith P. Posley, Ed.D.
Chief School Administration Officer
